

GRATITUDE

*A Collection of tributes
to our dear Jain Sir*

from your students

Thandavamurthy (1995-98 batch)

This is neither a poem nor an essay

This is really what my heart wants to say

On this amazingly special day!

I was a like a fuse

My brain used to get blown off by the physics concepts

Thought all this is of no use

Till you soldered the joy of learning into my brain!

That way you are a step-down transformer

Stepping down the difficulties of learning

And a capacitor, who held lots of lightning energy

A battery who powered us all through.

Once I shorted the power supply in the lab!!

You are such a great resistor of anger.

You just busted into laughter!

In the class room you are a lecturer

On the playgrounds you are a mentor

To Ruchir Sir, you were so dear

For all that you are, hats off to you Sir

You truly are a real Trayee star!

I never believed you can age,

You are 60 years young!

Much younger than all of us.

Compare our bellies to your fit body and there lies the proof!

You have been the power source to all of us

You gave us bun sandwich with cheese and chips

I still cherish it today and I think of you every time

Pastries, samosas, jelly ice creams -All the innumerable treats you sponsored are the best in our lives.

Like the Darlington transistor, you were such a darling to Swamy

You are the gold that emerged out of his alchemy!

You are the amplifier of his message

And simplifier of life like a sage!

Much after my studies

Many times, you came in my dreams

And announced portions and exam dates!!

Those were the worst nightmares of my life

And some of the sweetest memories.

Happy birthday to you Sir.

Sudeer P (1996–99 batch)

Jain sir, one of my favourite teachers, to whom I am greatly indebted for what I had learnt from sir. When in Brindavan, being in same wing of yours in my first year, to this day, I consider myself fortunate. While Swami taught us, you lived His teachings and made us realize where we need to put our effort and where we can leave to Swami.

Sir, I am confident that you would gain more energy after you turn 60.

Physics or physical activity, Discipline or divine proximity, You have demonstrated a pragmatic life that we all can adapt.

Sir, you made me understand how tough to hold on to something valuable while it's easy to let it go.

Sir, I don't remember the physics principles now, but I do remember the life principles that you had imparted with room cleanliness, sports meet, table etiquette, serving manners, punctuality be at sports ground, classroom or bhajan sessions.

I pray Swami blesses you with lots of energy, so that you continue to guide many more students like me inspiring them and become their role model, just like how I had you in my student days

Prasanth T H. (1996-99 batch)

Happy 60th Birthday Sir to a brilliant teacher, a leader and a devoted teacher. It was just amazing to see you give your 100 percent be it for Sports meet or Teaching at the class or guiding students at the Physics lab. You always had a conversation with students at their level and you could easily understand each student and guide them accordingly. Apart of academic and extra curricular activities, your taking care of residents of Vrudhashrama Brindavan in your free time showed your immense sense of service. I wish you a very Happy 60th

Birthday to one of the Best Teachers I have known in my Life and wish our Lord Sai provides all good Health and Happiness in your life,

Sivarama Krishnan (1996-99 batch)

To Jain sir, with love

Prof Rajkumar Jain - "Jain sir," for all of us - remains one of the remarkable men with whom I was fortunate to be mentored by as an undergraduate and later as a colleague at our alma mater - Sri Sathya Sai University.

Looking back, he has had this indelible and deep impression on, not just me, but a whole generation, indeed several generations and batches, of students.

Apart from being an excellent physics teacher in the classroom, he went to and goes to great lengths to make practical education both in the subject and, more importantly in life, an important facet of his interaction with students.

Not only do we recall his electronics lessons in the lecture hall, but also his very enthusiastic mentoring on all aspects of life. A lifelong lesson about etiquette remains relevant; "social work" sessions he led taught us the valuable sense of civic responsibility; evening sessions in the physics lab installed in us the hands-on approach to the subject.

It is impossible to list all the details of the many aspects of life Jain sir's influence as a teacher, mentor and friend endures and will continue to lead on and refine us as individuals, professionals and family members.

I wish Jain sir many many years of the best of health, happiness and joy as he continues to inspire, motivate and mentor generations of students to come.

Vijay Sai K. (1997 - 2000)

Dear Jain sir,

Wish you a very happy Birthday and a very happy, healthy and peaceful life.

Sir - You are a very dedicated and an exemplary teacher who always kept the welfare of the students in your thought, word and deed. I am very thankful to Swami for giving us such a wonderful teacher.

In Swami's institutes, many of his hand-picked instruments never get rusted (don't seem to age) and are ever active. Sir, You truly belong to this category.

Sir - We can't forget your lively classes in CM, NP and digital electronics/ Op-Amps. A quick back of the envelope / order of magnitude calculations in the class.

And more than these lectures, we cherish the life lessons that you had taught us throughout our stay in Brindavan.

Sir - Wish you a rejuvenated time ahead in HIS service.

Love and Regards,

Vijay Sai K

Aravind K

Dear Jain Sir, we all want to wish you a very happy birthday. Praying to our swami to continue to bless you with good health, energy and inspiration so you can continue to inspire more generations of students, with your passion and love for swami and dedication to swami's work.

Clearly recall it was our first Physics class in the first year of BSc, you had told us: Look Boys, three years will pass very quickly, make your stay memorable and useful in Brindavan and enjoy the glory of this place. This is the best phase of

your life when you are all just about 18 years old to start to learn how to bake bread, hammer a nail in the wall, arrange the flower garden or prepare microphone connections, learn to play an instrument, learn to sing, learn something new, challenge yourself, take some responsibility, make the most of your stay, myself and rest of the teachers at Hostel are here to guide you and help you all.

Sir, I think swami couldn't guide and physically help each and every student in the Hostel, because there was not enough time. Precisely for this reason, I think He handpicked few of his Boys and given them the blessings to teach and inspire generations of student with values and show student year after year what it means to be passionate and dedicated to anything we do, it could be Nuclear Physics Class or Electronics experiments where burned fingers soldering capacitors on circuit board [Afternoon Tea and Biscuits in our Physics Lab is very much fresh in our hearts and grateful to you, 24 ~ 25 years ago it was] or in the sports meet practices [Black Forest Cakes as special Treat from you] where we had to Jog in the early morning Fog. Forever grateful to you and sir and swami and giving us such an amazing brother, teacher, coach and guide. Wish you a very happy Birthday sir.

Thank you very much, thank you is a small word to express our gratitude.
JaiSairam.

Devarajan

Insight over wisdom over knowledge

Anyone can teach Physics. Yes, books could be read, the internet could be trawled and experiments could be done. And these could make one a good physicist.

So how different were Jain sir's classes? Everyone likes a good teacher. But in Jain sir, some found a friend, some a mentor, some found a good listener and some were even surprised at how he could "read" them even with very minimal conversation. Over and above the "Physics" he taught us, he had the zest to deliver quality education, with values. At times, he offered us *carrots*, and at some times the *stick* :) But personally, he was the best ambassador of Swami for a 1st year undergraduate student.

I still remember walking into his Electronics class in the 1st sem of my 1st year at BRN. I was forewarned by some of my seniors that this was one of the 'stay-sharp-and-be-on-your-toes' classes. But once you latched on to his wavelength, the going got easy. His lab sessions were fun - he has his own way of ensuring everyone fell into line. While being humorous, he ensured the person got the message. Till date - whenever I try to find out what's wrong with an electrical device, I start with the power source!!

The learnings from Jain sir were never limited to the classroom. There were lessons everywhere and at all times - be it the hostel corridors or while having lunch, while walking to the college or during the Sunday morning self-reliance activities.

If there was someone who is an epitome of this quote - *A teacher affects eternity, you can never tell where their influence stops* - it is Jain sir. Thank you, Sir, for all the lessons and wishing you a very happy 60th birthday.

Sai Shyam Sharma (2002-2005, BSc. Maths)

Dear Sir,

Even as you read this book, the first thought on your mind must be, was it necessary? Yes sir, it is necessary, may not be enough. You always believe in leading by example and that is why you are the most inspiring person for every youngster who has got to know you. Your concern for your students is like the rainbow, a different colour for every situation. As a student one needs three years or some times even more to be able to see these colours, maybe when at a distance one can see the rainbow clearly. I am lucky to have seen these various colours and learnt a lot from you. Hope some day I can be 20 % a teacher as good as you. Thank you for inspiring always sir. Inspiration never ends, it gets passed on.

Siddartha Kartikeya (2003-2006)

Jain sir is an epitome of practicality and wisdom. I have had the good fortune to be his student from 2003-2006 in Brindavan campus and every guidance he has given me I recollect to this day on daily basis. Jain sir to me is not just a teacher of Physics subjects but a Mentor, a guide to look up to, a humble servant of the Lord (who renounced his princely comforts and came to Swami), a strict task master for fitness and a very practical person whose lessons are not just limited to 3 years of study but for lifelong. More importantly he walks the path and thus leads the way. I remember Jain sir as a role model who always put Swami first, others next and himself last- how can I forget he used to be last person to sleep under the raging motor bikes or any dare devil stunts just to ensure the safety of students over his own.

I am very grateful to you, sir for teaching me and being my role model. I pray to swami sincerely from all my heart to always protect you and bless you

with excellent health and happiness and HIS Divine grace every single moment so that more students like me get inspired by your life lessons and guidance.

Thank you so much Jain Sir.

Ashish Pareek (2003-2006) (Bsc Hons Maths)

Sairam Jain Sir,

We always pray for your good health and pray to Swami that you continue to inspire the young students to walk on Swami's teachings.

Your love for Swami and student is inspiration for us always.

I would like to thank you and say I am really lucky to have studied beautiful life lessons from you and you will always be there in our hearts . Thank you Sir.

S Chand Rakesh Roshan (2003-2006)

Brindavan has been a place very dear to me and our teachers serving Bhagawan's institute have always been highly inspiring and delivering the best so that Swami's students get the best.

In one's life, there are a few teachers whom we look up to as role models. Raj Kumar Jain Sir is one of those teachers who has left an indelible mark in my life.

On one of the occasions in kalyana mandapam adjacent to the hostel, there was a session for all the teachers where students were asking some questions related to life etc. Raj Kumar Jain Sir's turn came and I was very curious to hear his responses as he is my Physics teacher. Then, there was this question put forward to him "who/what drives you? ". The answer was very instant, Sir said "I drive myself", this answer remained in my mind forever.

As far as I see Raj Kumar Jain sir stands for Flawless execution and perfection. Be it Physics, sports meet, daily routine in hostel, teaching students Life Skills during serving in mess etc, he is never a man of words, he does and shows the rest how one should execute the tasks at hand.

The energy and confidence that sir carries throughout the day is something remarkable and his interaction with students always provides something new for them either from subject point of view or from life skills.

Whenever there is huge task at life professionally (or) personally, I remember the statement “I drive myself” as this has been the mantra for me, As Bhagawan also says, give your best and then the Lord shall take care of the rest. At a Physical level, no one else will be there to push us for executing the tasks, we need to take it up ourselves and try our best for a good execution of the same. Then the result /output will never be in our hands, what matters is whether we have given our best to that task or not. We need to drive ourselves at so many occasions in our lives.

I sincerely believe it is my good fortune to have teachers like Raj Kumar Jain sir for having come in my life who show and lead the path and teach the lessons for life, I am very thankful to our dear Lord for having bestowed upon us such teachers who think about the students all through and lead us in the right direction at the right time in our journey of life.

Jain sir, you remain a huge inspiration, I have learnt a lot by observing you on how one carries himself outside, how one interacts with others, maintaining high energy and confidence levels all the time. You have taught me not just physics but skills for the rest of my life. Thank you is a very small term sir for the selfless service that you have done/doing. I Pray our dear Lord to shower his immense grace on you and family.

Take care sir.

Batch of 2011

Aditya Pusala

Dear Jain Sir, Sairam,

You might have heard this many times that you are an amazing teacher and this is absolutely true. All the efforts and hard work you invested in class or outside the class to bring out the best in us can never be repaid. I can only say that I feel very happy and grateful for having a teacher like you.

Wish you a very Happy Birthday and thank you for inspiring me and many more. Hope the future brothers at Brindavan continue to have this opportunity for a long long time.

Sanathana

I was one of those fortunate ones to be nurtured, shaped by Jain Sir, by your inspiring, exemplary actions.

Jain Sir, you always provided exceptional opportunities to your students. First, you are too good at understanding our hidden potential. Step 2, you go out of your way to nurture and bring forth the potential! I have numerous examples related to me alone. One such is my bachelor's thesis work to build electrodynamics kits.

Now, when I connect back the dots. You were not just encouraging me to build the kits together with Hari and Kumar Sir, you were fostering independent thinking, freedom to bring my idea and execution, time management, work-life balance, discipline at work, taking pride, responsibility on delivering the kits and lecture. In short, you nurtured professional, independent thinking, entrepreneurial aspects in me!

On a lighter note, despite your efforts, I am still not so good at other social behaviour, like wearing regular shoes at work or dining table manners! However, I'm getting better at it Sir, you know the reason! :P

For me, your proximity is one of the best chapters in my life, one of the reasons for me to cherish and associate for whatever my life offered me so far and in the future!

With Love & Gratitude!!!

Sanathana

Batch of 2012

Rajasimha

Dear sir, Sairam.

They say, "A good teacher explains while a great teacher inspires."

Thank you sir, for being such a great and inspiring personality in our lives. You have not only taught us Physics, but also Meta Physics in your own inevitable fashion. Among all of your teachings, striking balance between spirituality and professionalism is the most important one. How can we forget your advices on personal hygiene, social behaviour and leadership!? Every lesson you taught us added great value in our lives. We are indeed fortune to study under your guidance, sir. I thank swami for gifting such a wonderful teacher like you to all our student community.

Praying Swami to give you the Strength, Enthusiasm and Energy to mould and inspire many more batches of students in future too...

Vibhav Bharadwaj

Dear Jain Sir,

I remember a statement from the talk of CJM sir of mathematics where he mentioned that it is great to grow, spread wings and fly high but it is greater for someone with powers to fly but who fold the wings and teach others to fly. I believe that you are one such person who have taught us how to fly high. We, the students get applauded for achievements and progress in our careers but it is all because of dedication of teachers such as you. I cherish those memories that I have had with you and look back at them whenever I need direction in my life. Personally, you have taught me to live a life with discipline and energy. I was and am amazed at your dedication and your logical/practical approach towards life. Being a project student under your guidance and also being part of the sports meet

item, I have had the great privilege to learn and be molded by you. Even after completion of my studies, you have always encouraged me and congratulated me on all my success, which is a confirmation for me to head towards the right direction. I would only like to say that your presence in my life has led me to what I am today and I promise to lead a life of values as taught by you and the honor the title of 'Jain Sir's Student' forever.

I wish that you continue to inspire young and old students for many more years to come.

Batch of 2013

T.S.S Babu

It was one of those early January evenings, when practice for the sports meet was at full blast. Students from all the campuses had already traveled to puttaparti, and were coming to the hill view stadium during their allotted hours. This evening, it was the Brindavan campus' slot. I was in the primary school playground, young and excited by the heightened activity all around. I noticed that a bunch of kids were peeping over the playground compound wall, into the stadium beyond. They were visibly thrilled by whatever was holding their attention, on the other side. I joined in. It was a spectacular sight. A huge metal grid was hoisted up in the air (to a height of 80 feet, we were told later), suspended, using steel cables, from two cranes. Sixteen boys were perched atop the grid, performing aerobics in perfect synchronization. The event was (and has always been) called celestial rhythms. The adventurer inside me was aroused. That day, I thought to myself, "One day, I must be part of this event."

Many years later, when I joined the Brindavan campus, celestial rhythms was planned as one of the events for sports meet. And, ofcourse, I marked it as my first preference. But one had to go through a selection process to participate. With great trepidation, I went to the selection venue. There was Jain sir, incharge of the event. Ahead of me in the line were all the athletes of the campus. Looking at their toned physiques and confident demeanor heightened my sense of self-doubt. There were only sixteen places to fill; I probably did not stand a chance. Some people left. But I stayed put and went through the selection process. The next day, I was both amazed and elated to find my name on the list of selected candidates - it was a dream come true. Both to be part of celestial rhythms and to be working with Jain sir.

(When I got a chance, I asked Jain sir, why he selected me in the event. He replied, "You selected yourself.")

There is something about Jain sir that instantly catches your attention - a measure of exactitude. You see it in the way he speaks, dresses or carries himself. In all his lectures that I attended, I felt that I was witnessing a master showman in action - every line he spoke and equation he wrote, was delivered crisply and clearly; no mincing with words and never any clutter. He never moved ahead until the last person in the class understood the concept he was teaching. I loved the way he handled the electronics lab - so organized! One of the things I loved about Jain sir, was how he always remembered the snacks! We had snacks after our lab sessions, we had snacks after tedious practice sessions, we even had snacks when we helped with chores. We are fortunate to encounter people like Jain sir, in our life, however briefly. It gives us role models to emulate - a resource that is so rare in this world and a reason to be proud of our alma mater.

"No Jain, No Pain, No Gain"

Aditya Jayaraman

I still remember attending Jain's sir's first class. He has the way of making a very striking first impression. The way he carries himself in the class, his posture, his confidence in delivery of lectures are some of the things that any student would wish to emulate and imbibe.

Granted, we did learn interesting physics in that first class, but what stood out was his enthusiasm and passion towards teaching physics and most importantly, the eagerness to make us understand and wonder about the mechanisms of nature. I guess these qualities indeed did rub off on all of us.

I met him last year and visited the laboratory in Brindavan campus. I must say, the enthusiasm and the dedication towards his students and the care with which he was trying to ensure that all the students get equal opportunity to learn

via e-learning really touched me. He quickly adapted to this new mode of teaching and in fact ensured that students don't miss out on laboratory sessions by using online interactive tools! Times have changed recently, but Jain sir was the same...

I cannot just talk about Jain sir within the confines of the lecture halls. He was much more than that. He was like an elder brother to all of us students when we were at home away from home. His humility and pragmatism are other things that I admire about him. Despite being a lecturer in this field for more than 2-3 decades, he still has the eagerness to learn and the urge to improve just so that Swami's students get maximum benefit. We are indeed fortunate to have Jain sir as a mentor and role model.

Sir, we wish you many more happy returns of the day. You have indeed changed the lives of many students through your example. Hope you continue to inspire many more students like me. Thanks for always being available for us students. No matter what the issue, we know you are just a phone call away.
Sairam!

Batch of 2015

Satya Prasanna Mallick

Dear sir,

There are no words to express my admiration, love, and respect for you.

I had joined the brindavan campus without knowing anything about the University or Swami. But in less than a year, I got the best of the globe. And one of the best was you sir. There are no more words to say.

I miss being in your class, miss the way we used have fun in class, miss playing with you, miss your breakfast serving sessions, miss sports meet treats, miss talking physics with you, miss electronic labs, and many more things those are very much touched us. Most of the all, I miss your calculator jokes, sir. You won't believe it, sir, till date, I never miss having a calculator with me.

We love you sir and thank you so much for everything.

Shyam Sundar

Where do I even begin? For me, Jain sir is one of those people whom I look up to. Be it the perfection of starting the class with clockwork precision, the immaculate dressing, the quips or bringing up discussions, or persisting with someone till he starts to believe in himself. I still remember my 5th semester Op-amp course. Jain sir was explaining the flow of current. He called me upto the blackboard and asked me to trace the flow of current. My electronics IQ was quite non-existent at that time and though he had just explained the concept I wasn't able to explain it. I went back to my place thinking that he wouldn't ask me any more questions. The next day he again called me to the blackboard and asked me to trace the flow of current. As they say history repeats itself and I stood there frozen till he asked me to go back to my seat. All this time, my worry was about disappointing Sir rather than learn what was being taught. This pattern repeated

for almost four days before I caught the drift. And about the fifth day, I was able to trace the path. The look of happiness in Sir's eyes would have made people think that I made a discovery that changed the course of science. This was one of those key events that created a paradigm shift in my approach towards learning. Thank you, Sir, for your efforts in making sure that everyone in the class understood the concepts even if it meant repeating the same thing over and over again.

Batch of 2016

Bhuvanesh Ram

Though many teachers demand respect, there are very few who command them and Jain sir is one of the latter. I, along with my batch mates, fondly remember him more for his teachings outside the class than within it. His fitness standards, eloquence in communication, dispassionate disposal of duties, generous "treats" after we complete a task have all greatly influenced me and will continue to guide me.

Sir is so observant that once he even appreciated how I managed the stage during our annual prize distribution ceremony! I feel blessed to have been guided and touched by him during my graduation. To one of the teachers of whom I am a big 'fanboy', happy birthday sir!!

Saroj Poudyal

I come from a family of non-devotees, so in the initial few days of my stay in Brindavan campus, everything was confusing and foreign for me. It was difficult for me to understand swami messages and follow them. As Swami has said "Your life is my message", I saw the glimpses of his messages in the conduct of professors there. I was very surprised when I found out that professors sit along with us and eat meals. As days passed I was awed by the personalities of professors there, especially of Jain Sir. His suggestions and scolding were always to the point and always drove home the message. In my first year I was not keen on playing sports or any physical activity. In my second year, one day Jain sir came to morning assembly for jogging. He talked about the benefits of being physically active and demonstrated by doing 50 pushups. It inspired me and I started doing physical exercises. Everyday, I started to go for a run and slowly I started liking it. After a few months it became a habit and now it has become a part of my life. I will be ever grateful to him for this. This was my story

of how Jain sir has touched my life. I believe everyone who has come across him has learnt a lesson for life. Happy 60th birthday to you.

Swaroop P.

Fun disciplinarian sounds like an oxymoron. But that's what sir has been for us. He taught us the value of leading a disciplined life through practice. And we can enjoy our life doing that. Thank you, sir, for inspiring generations of students

Bharadwaj Chowdary M

Thank you, Jain sir, for bring the inspiration that you are. I will always cherish the memories that I have with you. Hope you have a great retirement career. Once again, thank you for inspiring me to do physics.

Praveen M Jodidar

Sairam Sir, Thank you very much. I feel blessed to have a teacher like you. You have shown us how to learn physics. I feel, the best time I had in Brindavan, was at the Physics department. Thanks for creating such an environment.

VSS Laxman Rao Bellala

Personally Jain Sir helped me a lot, I was never so good at the subject. But he used to explain all I asked, sometimes the same questions over and over again. Finally I was very happy to do my project under him in the final year of my B.Sc., where he used to track my progress. His guidance helped me with all my explanations and understandings. Thanks a lot sir, you are always an inspiration.

Gamini Rohith

Sai Ram sir, I want to start by thanking you for all you have done for us. It was mainly in your classes that my interest in electronics and physics in general was greatly improved. Not only did you teach us in the class but out of it also by teaching us from life skills to something like table manners.

I still remember during exams when teachers serve breakfast, we used to mainly go to the counter you serve so that we can get more potato rice, as you were very generous when you serve compared to others. Also how you used to call me "chocolate boy" lovingly as I used to answer questions in class only when you promised as chocolate to whoever answered the question. I also treasure the many interactions we had while I did my 3rd year project under your guidance. May Swami bless you with all happiness and prosperity for the coming chapter in your life. Thanking you again for everything.

With thanks and lots of love,

G R R Rohith

Bikal Khanal

Swami says love and discipline should go together. Jain sir is one of the best examples of it. Electronics was the most interesting class for me in our Brindavan days. There was a sense of strictness mixed with love when Jain sir entered the classroom. Moreover, none of us can ever forget the snacks he used to get after every extra-class or even if the last period ever got extended. And going back late to the hostel would mean there's nothing left for us to snack on.

Personally, I was gratified by this simple looking gesture of his. I said to myself that we have a teacher who acknowledges and responds when his students were hungry. I loved his teaching style and the way he made us grasp the concepts iterating them in different ways. But, nevertheless, we had seen flying wires dug

out fiercely from the breadboard during our practical sessions. Well, that simply means, Jain sir is angry. When I was asked to add something for this compilation, the first thing that came to my mind was the way I got his scolding for writing that extra decimal digit which my calculator showed but the multimeter didn't. That came all along with me and its seven years since then. And it was just two days ago when I asked my Physics students to cross out the third decimal digit that their calculator showed but the Vernier caliper didn't. I was smiling to myself remembering Jain sir, his classes, the time spent in Brindavan, and the lesson disguised in his scoldings that had corrected me then and, ofcourse, now too. Apart from learning the contents of academics, we also have learnt a more important aspect of our being. His actions did speak a thousand words. The example Jain sir has set through his conduct has shown us how to be in-line with Swami's teachings. And that's more important than any lessons learnt in the classroom. I am very glad for this opportunity and thank Jain sir for everything, seen and unseen, he has been for us.

Sairam Saikumar

A small anecdote that gave us a peek of sir's work ethics: It was 2015 and that particular year for sports meet, all the men's campuses decided to team up and offer a combined performance on the 11th of January. I had always wanted to work with him for a sports meet event due to his incredible leadership qualities and ruthless energy. In fact, I witnessed this personally the previous year and needless to say, I started to look up to him as my role model. So, I decided to opt for bike stunts for which Jain sir was one of the responsible people. Long story short, I had one of the best sports meet practice times in all my years in Swami's institutions. He was such a leader that everyone looked up to and one could easily see his passion, creativity and relentless effort to perfection. After a brief session in Brindavan, we moved over to Prashanti Nilayam for our practice sessions, just

as the other groups. On the morning of January the 10th, we were ready with our final practise session and were highly motivated to put our best foot forward. A few minutes before the music began, he came out to give us a little pep talk, that eventually left everyone awestruck. He ended it with a sentence that went like this "Work hard as though no amount of prayer will help and then pray as though no amount of practice will be enough". It was such a powerful sentence that holds for everyone in every stage of their life. This sentence embodied everything about him; his preparation for lectures, planning for events, and more of all, his private and close association with our Lord. If I can take one thing from him, it would be this lesson that he gives every year to his students. He has been such a valuable asset to the Institute and I am quite sure that he is well-remembered by each and every student that has passed out from the Brindavan campus during his tenure. On the occasion of his 60th birthday, I wish him all the good health and success in every endeavour.

Pamarti Viswanath

If I look back, I would say, Jain Sir was heavily influential in my life. The reason is because of his electronics classes. His way of teaching was so strong that I can clearly remember most of the concepts until now. I would like to share my recent experience on how he had to play an important role in my life. Recently, I graduated from my PhD course from a University in Japan. The lab where I had worked for my PhD consisting of Japanese students and Indians (mostly from IITs) were quite surprised to know about my skills related to electronics. My lab members would often come to me for any questions related to basic electronics. Not even that, my own experiments in the lab were to deal with lots of electronics, especially op-amps, lock-in, etc and it was a cake walk. As I started to notice that the skills I acquired during my BSc days were immensely beneficial, I will be always grateful to Jain Sir, as I could easily finish my PhD.

Its hard for me to believe that Jain Sir is completing 60 years this January ! I wish him best wishes and pray Swami for his good health. During my BSc days and even now, I wondered why he appeared like he was in his 40's. I am convinced that the proximity of him with Swami has given him such a wonderful immutable health and energy. And I pray and wish him the same good health in the coming days.

Vedanta Diyali

“It is the supreme art of the teacher to awaken joy in creative expression and knowledge”-Albert Einstein.

Teachers are like the building blocks of society who educate people and make them better human beings. It has been rightly said that teachers are a special blessing from God to us. Looking at the teachers we had, I am of firm belief that they were indeed a blessing from Bhagawan Himself. When I think about Brindavan and the Dept. of Physics, the first thing that comes to my mind are the beautiful memories we had at the department with the teachers. I am sure most of my friends will agree with me on this. Physics would not have been so much fun and learning would not have been the same without our dear Rajkumar Jain Sir. Congratulations Sir, at 60 years young, you are a constant source of inspiration for us in all aspects.

I vividly recollect the experiments on electrostatics Swaroop and I performed in front of the class. One such moment that shall forever remain etched in my memory was when we were doing our final year projects. Prayas and I were doing the project on Great Experiments in Physics under you. We were thrilled to use the different equipment and apparatus. I recall your being so calm and composed when I dropped the laser we used for the determination of speed of light. I was flushed with dread the very moment it fell from my hands. By the time we reached

our final year, the department had become the place we spent most of our time. The evening tea with biscuits and the watermelons during summers at the department were our exclusive treats that we felt lucky for.

You taught us to find joy in our subject and your immense kindness and generosity have greatly impressed upon me. I am so grateful for all that you have instilled in me and made me what I am today. We love you, Sir.

Karan K H M

Prof Jain was instrumental in shaping some of my characteristics. During the class while teaching, he used to ask me a lot of questions on the subject, which in a way made me to be alert and to pay attention. Being well prepared before going to electronics lab was crucial to do any experiments and Prof Jain made sure that we studied before we did any of the experiments, else we were not allowed to enter the lab. Later, I realized that without understanding the concept there was no use doing any of the experiments; and in this way Prof Jain moulded us to become better students. I was part of Auditorium self-reliance group which was handled by him. Discipline and orderliness were instilled to us while working under his supervision.

During a casual talk with my friends in Brindavan, I also heard that sir also volunteers for the old age homes. Hearing it made me to realize that I should also imbibe such precious qualities. I cherish all the memories that I had with Prof Jain and I am happy I studied under him.

Vamsi Krishna

There are very few teachers one remembers for life and Jain sir is one of them. I'm so grateful that I was one of Jain sir's students. His dedication and

commitment never stops surprising me. There's so much one can learn from sir. A perfect gentleman.

Ananth R

You have Always been an inspiration to all of us. Your wit, compassion and the zeal to serve are the standout qualities which has deeply influenced generation of students, including me. I still remember in the first semester in Brindavan, when I had broken a finger, you made it point to ask about it in every lab session. So, I was comfortable in handling equipment. I still remember the enthusiasm in each of us to learn in your classes. Thank you for instilling in us that zeal to learn and marvel. The one thing I took to Sai Krushna Vidya Mandir (A rural school run by Sai Alumni). Thank you again for everything.

Shaurya Verma

Sir, you were my first guru on my journey of becoming a physicist. Therefore, the time I spent with you as your student can never ever be forgotten. The backbone of the Brindavan physics department, that is you and your team of professors, have played such an important role in strengthening my fundamentals. This helped me in a smooth and confident transition to masters. As your student, I have learnt lessons for life. You would never make anything easy for anyone but you would also reward us for the hard work we put in. You always had such high expectations from your students and always motivated us to become the best in what we do.

Besides the classroom relationship, I also had the opportunity to have you as my mentor, be a part of your bikes stunts event during sports meet and share the same Grama Seva truck several times. Those were undoubtedly some of the best days of my entire life. As I write this down, I am experiencing a surge of old memories

from my time in Brindavan and there is so much to say and thank you for. But I would just like to sum up my feelings in a few words by saying that, sir, you have played such an important role in moulding my personality and making me the person I am today. I will be ever grateful to you for accepting me as your student and teaching me lessons the hard way. I will always remember your teachings and make you and swami proud.

Gouri Shanker

Sai ram.

I have learnt a lot from Jain sir, both academics and beyond it. Something that I will never forget is my experience and approach towards electronics. I had gone through the course lab work and it included many facets, including how to build a power supply, all sorts of transistor circuits, Op amps, and many other things for which I don't even remember the names. Most of the circuit designs and concepts had faded away after completing the coursework. Or so I thought. A year after leaving Brindavan, I tried making some DIY projects out of my own interest and I realized that I would have to do lot of electronic circuit designing for that. And to my surprise I was able to do this part very naturally. The only times I found myself using the internet was to look up for the data sheets. I was pleasantly surprised with myself. I used to be scared of these data sheets. But now, it was all so easy, even after a long gap. And thanks to all the training with the soldering and the troubleshooting skills I got by observing him.

Whenever I work with an oscilloscope, I remember him. I remember it clearly that when we were in our first year, he had arranged for third year seniors to teach us about the oscilloscope. And when we were in third year, he made us teach that to the freshers. Whenever I need to repair a faulty power cord wire,

I always cut the positive and the negative wires unequally, another handy trick I learnt from him and I use it quite often. Outside the classroom as well, he has a very inspiring personality. He is always so disciplined, appears so neat and confident and clear in his thoughts and speech. I have learnt a lot from many other professors and teachers, but the learnings that I have received from Jain sir are unique and I will always remember them.

Ratul Sabui

I believe that any word offered in this tribute shall be inadequate to portray the personality that inspires it. For most of us who knew Jain Sir, he was a person capable of being the captain, the engine and at times even the passenger of the ship that he commanded. What made this even more remarkable was the prudent selection of the role he that he made to suit any situation.

As for his presence in the classroom and the lab, none can debate the impact that he had on us students. His lectures had this air of simplicity that brought even the weakest of us into our comfort zones. One big lesson that I learnt from him was that knowledge is best imparted in little details. There was never a day when we were intimidated by an overload of information. His expectations were always high but we barely ever felt the burden that generally comes with it. A timely “Good job” or even a slight nod from him would steady the flailing confidence whenever our attempts at the electronic bench went haywire. Inside every student lies an innate adventurer wanting to break free. In my third year, as we were asked to choose our ‘projects’, I remember walking up to him and saying, “I don’t want to do physics.” Of all the responses one might expect for such a strange demand, his came as a total surprise. he thought for just a few seconds before saying “I have an idea for you. “Within the next few days, we were sitting at a quiet bench in our lab trying to design a website for school children. There were various regulations active back then, but in spite of all of those he could arrange for

external help and flexible timings. This was something very new for all of us at that point and sir used to join us in learning the intricacies of the trade. In those moments, we knew that the adventurer could be more of a student than we ever were.

Beyond the confines of academics, his nature was perceptive and persuasive in equal measures. I happened to be in his Gram Seva team (and other groups that I don't recall at this moment) and his leadership seldom called for complaints. Each of us had our defined roles to play and every contribution fit into a jigsaw of optima. It was a matter of pride for the students working under him and jealousy for those who weren't. The effect stayed with us, the physics batch, even in our MSc. days where we were always the most effective in any team effort that we chose to put our heads to. Athletics was never my forte but I always made an effort to work towards my fitness. This was until laziness started to eat away at my morning hours during my 3rd year. Sir noticed that I had stopped coming for my morning runs, and one fine evening he reminded me of it. At first, I brushed it aside with a guilty smile, but he was not one to give up so soon. He kept reminding me almost every single day till I returned to my old ways. I am very grateful to sir for this. There is another incident that's etched clear in my mind, one which I feel I must share. I had completed my lab work one afternoon, and after the customary chai session (thanks to Suresh), I walked into the classroom to pick my bag. Sir was sitting on one of the front chairs, arms folded, with his stare fixed on the empty board. I did not want to disturb the silence that was marred only by the monotone of a ceiling fan. As I tried to sneak in, he sensed my presence and said "Ratul, I think I am growing old." His voice seemed broken. I did not know how to respond or react, so I stood there waiting. Just a few moments had passed, when he got up from his chair, and said "Get your racket. Let's play tennis." There was a remarkable change in his tone. He sounded like one who had just challenged adversity and emerged victorious with a first round KO. If ever I succeed in tuning my attitude to my will, I know

where to draw my inspiration from. Inspiration, I believe is the one word that is synonymous with any student's memory of Rajkumar Jain. The underlying constant of Brindavan, as many would agree, has always been a play of love encased in discipline. He stood for a very pragmatic form of discipline; and unlike a few others, his discipline never acted as a handicap for the ones who chose to follow it. Sir, in our eyes, you have always embodied the strive towards perfection. I pray that in the years to come, you keep inspiring students and guide them towards the lofty ideals that Swami envisions for all of us.

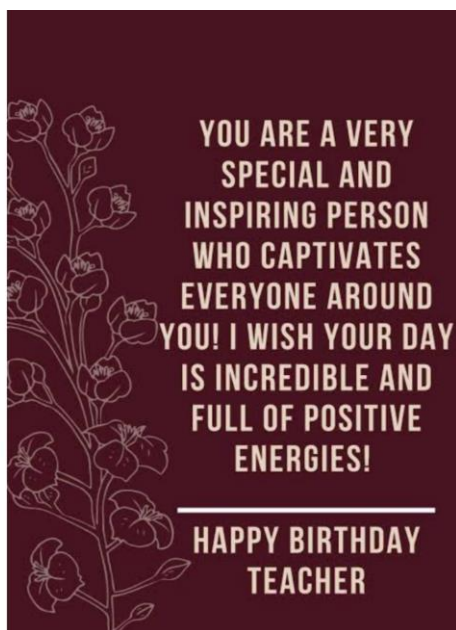

Batch of 2017

Saigovind

Sairam Jain Sir,

I am Saigovind P. 2014-2017 Batch. Bangarus is our Batch name.

There were so many teachers who came across my studies till now. But the one who inspired me and felt like keeping as a role model is one and only you sir. I could see you a teacher in classroom and a player in cricket ground. When the need comes for a student and if it comes to your notice, yeah you are there behind him, supporting him till his need is achieved. I have joined for B.Ed and if anyone one of my students ask have you seen any teacher who is all-rounder I have only person to show time. It's none other than you only.

Miss you a lot You and your support Sir.

Thank you. Sai ram Sir.

Parikshit Chettri

It has been my privilege to be your student. Thank you for teaching us the valuable lessons of life. Congratulations on a long and inspiring career.

Thank you so much sir. 🙏

Balmukund Kumar

With all Love, I Wish you all the best in life ahead. Swami always be with you sir.

Disciplined mind can achieve anything. As a teacher, as a mentor, as a life lesson giver personally an inspiration for me. Truly feel I don't need a yoga guru or teacher just see you and start my routine.

Thanks a lot sir for the valuable lessons for life. Honoured to be in your classes.

Tejasvee KM

It was a great time when we were at Brindavan. I am so lucky to be a physics student when you were there as a teacher. Even today when I open a textbook which you taught I can hear your voice. You had such an impact on all of us.

You are one of the wonderful teacher and also one of the wonderful person I have come across. I will be grateful to you always.

Thank you sir for all the physics and life which you taught us.

Dev Narayan MN

Respected Sir,

It is difficult to pen down in words about how much influence you have inspired in our lives. For all those we have learnt from yourself both in terms of academics and for life, with gratitude we would like to thank yourself. At times when situations turn difficult in life we try to connect with things we have learnt during our stay here from our elders. Yourself has been a main reason for me to even choose Physics, which I feel lucky and blessed to pursue for research. During each class of yours just by your presence and communication itself there were a lot to learn. The passion to teach that you have spread to us is what makes us deliver the best we can at every opportunity.

You were a mentor to us and we thank you deeply for that Sir. Frankly this passion that you had sown in is what let us where we are today and we are forever in gratitude for that sir. We humbly thank Swami and yourself for the inspiration and everything that you have done for us until now.

Manohar Darla

Sairam Sir, it's been truly an honor to be your student and acquired knowledge from you sir. Even today I am remembering the way you taught me while I teach my students as well as while I sit to study. You have played a vital role in my life that I can never forget till my last breath. Thank you very much for your guidance, sir.

Batch of 2018

Vaibhav Mahendrakar

Respect and Inspiration are the two emotions that come to my mind when I get reminded of you Sir. From Physical fitness to Physics, from Discipline to Confidence, you have been a huge inspiration in shaping me. Thank you very much.

Aditya Kumar

Uncle Jain, You have been a source of tough Love in Brindavan.

Be it a Rose is a rose is a rose or ice creams for taking extra hours, I will always be Grateful to you.

Thank You!

Rohan

Respected sir,

I remember the first time I walked into his morning class 5 minutes late, and he kicked me out, responsibility and professionalism were not exactly my strong suite. I know almost everyone will tell him this, but I do explicitly thank him and Ruchir sir for making me a better professional.

One day when I become an elite professional Physicist, I hope I can tell him this in person.

Malhar AN

I was fortunate to have you as my mentor during my final year and had some wonderful interactions with you. Being a part of celestial rhythms under your guidance has also been an amazing moment in my life.

Thank you so much for sowing the seed of Physics in me, inducing the discipline required to work in a lab and sharing your beautiful and insightful experiences with Swami.

Wishing you a happy, healthy and wonderful year ahead.

Seeking your blessings,

Malhar A. N

Batch of 2019

Yash Gupta

A very happy birthday, sir. And for many more happy revolutions around the sun.

Debashis

Happiest b'day Sir. There are few people who leave indelible imprints in our lives, you happen to be one such person to me. I will always and always be grateful for all the things that you have helped me learn and grow in my life. Good wishes and healthy life to you sir.

Abhishek Rao

Dear Sir, Wish you a very happy birthday sir. Thanks a lot for being an ideal for hundreds of us. May you keep guiding and motivating batches to come too. Wish you a healthy and prosperous life ahead!!

Batch of 2020

Himanshu Batra

Happy Birthday Sir. You are a great inspiration and I always look up to you.

Yogesh Sridhar

Happy Birthday sir!!! May Swami bless you with health and happiness always. Thank you so much sir for all the support and guidance you have given me throughout and beyond my stay in Brindavan. The initial months of the pandemic & lockdown was quite daunting for me, having to take care of my grandmother alone and leaving BRN early. But your support to ensure I was doing well and checking up on me often is something both my parents and I are very much grateful for. Thank you, sir, for all this and many happy returns of the day. Sairam.

Bibhuprada Acharya

Happy Birthday dear Jain sir!!! Like many students who had joined the college after Swami's mahasamadhi, I tried to look for Swami's ideals, characteristics in all the teachers in the college and I found lot of Swami's teachings being practiced by you. You have been an inspiration for many students and I am no different. On your birthday, I wish that Swami blesses you with His divine blessings and I too seek your blessings so that I can practice whatever you have taught us through your words, actions and by your personality. Happy Birthday sir. Sairam.

M Akhil

A great mentor and motivator in my life.

Katakam Devaharsha Shiva Sai

Happy Birthday and Many many happy returns of the day to you sir. 🙏🙏🙏 It is very unfortunate that we are not able to physically come there and celebrate your special birthday (especially the treats 😊). But I derive a great joy when I get reminded of the beautiful days we had spent in the department. Those wonderful classes filled with lessons for life, a spice of fun & humour and obviously academics...I still remember the wonderful evening lab sessions, sometimes followed by the ball badminton game, filled with jokes, sarcasm and all the enjoyment... All these things just seem to have happened a day or two ago. But two years of time has passed by in a flash. Likewise, 60 years of your life has also passed by and now you are stepping into yet another amazing phase of your life. I wish that this phase of your life also becomes a more beautiful one. Thank you, sir, for always inspiring me to be a good person and for motivating me in trying to be perfect in all aspects of my life. I pray that Swami blesses you and hope that many more batches of students get inspired and guided by you. Once again Happy Birthday sir. Happy Birthday and Many many happy returns of the day to you sir. It is very unfortunate that we are not able to physically come there and celebrate your special birthday (especially the treats 😊). But I derive a great joy when I get reminded of the beautiful days we had spent in the department. Those wonderful classes filled with lessons for life, a spice of fun & humour and obviously academics...I still remember the wonderful evening lab sessions, sometimes followed by the ball badminton game, filled with jokes, sarcasm and all the enjoyment... All these things just seem to have happened a day or two ago. But two years of time has passed by in a flash. Likewise, 60 years of your life has also passed by and now you are stepping into yet another amazing phase of your life. I wish that this phase of your life also becomes a more beautiful one. Thank you sir for always inspiring me to be a good person and for motivating me in trying to be perfect in all

aspects of my life. I pray that Swami blesses you and hope that many more batches of students get inspired and guided by you. Once again Happy Birthday sir.

Bhaskar Neerati

At the outset, I thank Swami for guiding you into the path of teaching profession by which many of us learnt so many valuable lessons not only in academics but also for life. I enjoyed your classes a lot sir, they were always filled with values and used to be engaging. I heartfully thank you sir for your guidance which helped me to build a character. The wisdom you shared with us will always stay at the top of our hearts. I always try to be the student which sir and Swami wanted us to be. And at last, I wanted to share this with you that is I like the way sir used to call me. Sir used to call me 'Boxer' instead of 'Bhaskar'. I thank you sir for everything.

Suraj Kumar

A very very very Happy 60th Birthday sir. Be it academics, soft skills, sports, spirituality you always have inspired me sir. Thanks for sharing all those life lessons which you have learnt being so close to swami. I would always hold your lessons close to my heart. Sai ram sir.

Sidharth R

Sairam sir. Of all the things that I have learnt from you, the one which is deeply engraved in me is your attention to small things. I vividly remember, those moments when you used to instruct the lab assistant to put the small snippets regarding etiquettes on the department noticeboard. I always loved reading

those & often used to note down them. When I came out of hostel, I had lots of opportunities to put those into practice. I thank you for taking that small initiative, it has helped me in a great way. Regarding practical sessions, I have learnt many lessons in a hard way under your guidance. It is obvious that those days I didn't feel comfortable being in such situations. But right now, I must confess that I am grateful to you for all that. Now, it feels as though those principles are embedded into us (they come naturally to us) where as it is not the case with all our friends who have joined us freshly. Keep inspiring students in this way (unique indeed) sir. Thank you for taking all the troubles to make us perfect. Happy 60th birthday sir. May Swami be with you during each moment of your life.

Batch of 2021

Darsan

It is said that "a teacher takes a hand, opens a mind and touches a heart" and you, sir, showed this in its truest sense. The insights that you passed on to us were truly amazing as the "learning" was not restricted to the classroom but also to each and every interaction that we had with you. Be it on behaviour, appearance or even day to day activities, you always gave us your valuable advice on the optimal decision to make. It would be no exaggeration to say that you were a father figure to all of us. And even with all this, you always kept a respectful distance, not over indulging in anything, be it the classroom or the leisure talks that we had while having the evening tea.

I could go on and on as I've had few personal moments that I'll carry forward throughout my life. You have my immense, immense gratitude for everything that you have done for me personally and my fellow brothers.

I sincerely hope and pray that you continue to inspire lot more students even after you re-"tyre" and I pray for your health and wellbeing. Please do take care of yourself.

Vasu

Sairam sir,

Wishing you a many more healthy years, may Swami's love be with you... You are such an inspiration for us sir. Ever vigilant, Dynamic person we have ever seen.... You are the first person that I have seen and thought "Is this how a swami student should be? Wow". In our first year you shared with us that when you joined Brindavan you started doing push-ups daily and in the next 2 years you were able to reach around 200 (don't remember the exact count 😊)

And in one of the satsangs sessions we had in b floor you said "if you can't change your fate, change your attitude"... You may not know but even now most of the students will remember these words sir...

And also, your way (I mean Ruchir sir also) of serving/helping others is just amazing. (Because you never felt any doership).

Finally, sir, praying for your health, we MAY forget what all the kind words you said but we NEVER forget how you treat us sir. (Seeing you only I decided, if I am in a good position in my life I should also serve and love Swami's students like you)

Have a great and healthy year ahead sir.

Sairam

Sidhant Dewan

Happy Birthday sir,

Wish you a long, healthy and happy life. Thank you for everything you gave us. If there is a competition to rank the dedication towards teaching, I am sure you would be the champion.

Madhusudhan

Sairam sir...

I wish you many more happy and healthy years ahead. You are an inspiration to many students. You and your teachings have set a standard for our lives. We learnt from you sir. Thank you so much for your love and care.

Take care sir...

“The best gifts a student can possibly get are a TEACHER like YOU and a PLACE like BRINDAVAN.”

Parishkrith

Wishing you a very happy birthday sir.

Many times, I wonder if I'm really worth all the love and concern that was showered upon us. I may not have a physical father but Swami has definitely blessed me with an awesome father, which is you sir. You have truly lived for Swami's sake by dedicating your life for HIS property. Ever grateful to you sir. Will definitely pay it forward if not back. Sairam sir. Divine 60!

Harikrishna

You taught us how to tackle every situation in life with a smile on the face. Today, we all feel grateful for having a teacher like you. Happy birthday!

Onkar D Kute

Sairam sir.

Thank you so much for being so caring towards us. I have never come across a person like you who is always willing to do anything for students. Your presence always encourages us. From bottom of my heart wishing you a HAPPY BIRTHDAY sir and a very happy and healthy life ahead.

Sahil Pradhan

To a true blessing of a teacher, I'm wishing you a wonderful birthday today. Your patience, empathy and devotion shine through in everything that you do. I have nothing but gratitude for you. It's truly heart touching how you cared for us as your own child. I can't fully express how appreciative I'm for what you've contributed to my learning and the knowledge you have imparted onto me. You

are more than just a teacher/mentor. There really is no other teacher as wonderful as you.

Best wishes to you sir!!

Batch of 2022

Majji Siva

Nothing is more special for me than attending your offline classes. I wish you a very Happy Birthday sir.

Sirshi Ram

Sairam sir, A very happy birthday sir!

Sir's a huge inspiration for me. I've learnt a lot from the narration of sir's experiences to snippets that sir would share with us during lectures. I hope we all can meet soon physically and then we can cut a cake and re-celebrate sir's birthday 😊!

Thank you so much sir for all the help and support,

Sairam

Sai Krishnan

Happy birthday sir, it indeed was a privilege to study under your guidance. Thanks a lot for that and the sweets you distributed throughout the year back in Brindavan.

Balaji Kolar

Happy Birthday sir, Wish you all the happiness in the world. I'm blessed to be a student of yours.

Srikant Kumar

Happy birthday to you Jain sir!

May swami bless you. I am fortunate to have you as my physics teacher. Your commitment to work has always inspired me.

Bhargava Jogi

Sairam sir....I am wishing you a happy birthday...May Swami bless you with all good.

Ujjwal Chhetri

Many many happy returns of the day dearest sir. May Swami bless you with a lot happiness and good health. From teaching us the practicality of the subject to teaching us the practicality of our life, you've always been a great inspiration. Thank you very much for all that you've taught me. Hoping to see you as our teacher even in the upcoming semester. I hope that we all could meet soon. A very happy birthday dearest sir.

Rohan Pattar

Congratulations and best wishes, dear respected Jain sir!

I hope this day fills your heart with joy and marks the beginning of another fantastic year in your life. A very happy birthday sir.

Pradeep

Many many happy returns of the day to you sir. Really, I am really very grateful to you for being such a wonderful teacher. I've learned a lot from you which will help me in my life. At last, thank you for being patient with me sir.

I hope that your teaching becomes inspiration to many students like us. once again, a happy birthday to you sir.

Arpan

Mere words could never express my gratitude to you for truly caring and being there for us. Your class has always been very interesting, the way in which you teach with full of energy and enthusiasm is very admirable. You not only guided us in academics but also in our life. We are really fortunate to have a teacher as inspiring as you. Wish you a very very happy birthday. May Swami bless you with good health and happiness.

Nikhil Gurung

Wish you a very happy birthday sir. May Swami bless you with good health and happiness..... and thank you for always being the guide and inspiration to all the young minds....

Ashit Sharma

Happiest birthday dearest sir. May Swami bless you with long life. You are the inexhaustible source of knowledge and wisdom. You illuminate soothing light that purifies us.

Sidharth V Sai

Dearest Jain Sir,

Here's wishing you a very blessed and happy birthday!! I pray to Swami to shower you with His love and grace and keep you dear to Him always!! Thank you for being a source of inspiration as well as someone we can rely on!! Have a wonderful day and an amazing year ahead Sir!!

With love and regards, from Siddharth.

Sai Ankit

Dear Jain sir, you've made a profound impact on our lives. The way you've been moulding and guiding us all through our academic journey is what we believe to be nothing but our true golden good fortune. You're the Prince, sir; Swami being the King. We still remember our 1st sem electronics, under your tutelage; From impeccable and sweet lectures to the majestic and furious Lab hours;

From the extra classes to declaring sundays as holidays; We became what we are today. As is Picasso with his brush, so are you with your chalk, creating masterpieces and making us capable of having a mind of our own. On this occasion, we wish you a very happy and a blessed birthday! You've aged gracefully, sir. We pray your blessings and guidance be with us throughout.

Thank you again, sir, for being such a wonderful personality, spreading Swami's message of Love, simplicity and integrity. Wish you a very joyous new year, sir! Please take care of your health, sir; We are always there for you, similar to how you've always been there for us. Loads of Love and Respects. Jai Sairam!

Jai Namdev

Having a teacher like you in life is an assurance that no matter how difficult life becomes, I will never be lost in the darkness. The lessons you taught Classwork us will always remain in our hearts like an engraved gem. We have only love and respect for you in our hearts. Happy birthday sir!

Amal Krishna

You possess all the sterling qualities of head and heart which makes someone deserving to be called 'teacher'. I adore and like you for his good qualities of learning, teaching, patience, forbearance, fortitude, kindness, devotion and dedication. This statement is something which I will always hold dear to me

"A rose is a rose is rose....." Many many happy returns of the day sir. May Swami bless you....

Suvam

I wish you a very happy birthday sir. The moments spent with you were very precious and special to us. We all are very grateful to you for being a constant motivator and supporter of our thoughts and ambition. Whenever I talked to you I never felt like talking to a stranger, you were so friendly and approachable all the time. May god bless you with a long and happy life.

Abhaya Krishna

You are a very special and inspiring person who captivates everyone around you! Happy Birthday Jain sir. I wish your day is incredible and full of positive energy.

Om Singh

Sairam sir. It's a true blessing for me to learn by such a wonderful professor who adorned my life and future. You have an engaging personality. Students never get bored during your classes. Thankyou professor for everything you taught us whether it's the subject or about our life. Happy birthday sir!!

Prawesh Tamang

Happy birthday dearest Jain sir. I wish you a great new year and good health.

Ravi Kumar Sahu

Many more happy returns of the day sir. I wish you good health and lots of happiness for the years to come.

For every passing day there need to be some form of inspiration that constantly pushes you to face the obstacles that come along with these passing days. For me you have been this source of inspiration. Thanks for always supporting me in my hard times. Apart from academics I truly adore you for your communication skills and enthusiastic personality.
